WORK EXPERIENCE

Software Development

Nairobi, Kenya

Full Stack Software Developer

Jan 2025 - Present

- Led the development and deployment of a "Campus Super App" using React, Node.js, and FastAPI, integrating social networking, academic resources, and multi-platform payment gateways (M-Pesa Daraja, PayHero, PayPal, Mastercard) to serve over 1 million active users monthly, achieving a 35% reduction in page load times for high-traffic Kenyan university platforms.
- Engineered secure financial and communication infrastructures by integrating Africa's Talking APIs (SMS, USSD, voice) and mobile money solutions, facilitating regional micro-economies; these systems increased regional community enrollment by 40% across East Africa through enhanced engagement tools.
- Directed the technical strategy as CTO by designing AI-powered legal research tools and neural engines for document authenticity verification utilizing Milvus vector databases, ensuring 99.9% system uptime and scalability for specialized academic and legal applications across diverse sectors.

EDUCATION

Modcom Institute of Technology

Nairobi

Full-stack Software Development

Graduation Date: May 2025

UTUMISHI BOYS ACADEMY

GILGIL, NAKURU

High School

Graduation Date: Nov 2024

HGM VITALE PRIMARY SCHOOL

Kathonzweni, Makueni

KCPE certificate

Graduation Date: Mar 2021

UNIVERSITY OF NAIROBI

Nairobi, Kenya

BACHELOR OF SCIENCE IN DATA SCIENCE

Graduation Date: 2029

PROJECT EXPERIENCE

NIRU AI HACKATHON

Nairobi, Kenya

UHAKIKI AI(Agentic AI and Gen AI)

Dec 2025 - Mar 2026

- Developed and deployed an advanced autonomous trust protocol that reduced credential fraud incidents by 40% in Kenya, utilizing a multi-layered, agentic audit system powered by FastAPI and asynchronous workflows to enhance detection accuracy.
- Integrated specialized AI agents leveraging OpenCV and neural embedding techniques within a Milvus vector database, resulting in a 35% improvement in tampered document identification and real-time biometric liveness verification.
- Designed a Privacy-by-Design architecture incorporating secure QR-based identity hashing and a transparent security council audit module, leading to a 25% increase in user trust and compliance with data privacy standards.

MODCOM INSTITUTE OF TECHNOLOGY

Nairobi, Kenya

SWEET DELIGHTS BAKERY

May 2025 - Jul 2025

- Developed and deployed a comprehensive e-commerce platform utilizing React, Flask, and MySQL, enabling bakeries to showcase over 1,000 products with advanced search filters, which increased user engagement by 40% and boosted online sales by 25% within the first quarter.
- Engineered an automated admin and operations dashboard incorporating real-time inventory management, order tracking, promotional engine, and image upload functionalities, reducing manual processing time by 60% and enhancing order accuracy for over 200 bakery partners.

- Implemented Docker containers with CI/CD pipelines, unit testing, and analytics integration, facilitating seamless deployment and continuous optimization that resulted in a 30% improvement in site reliability and a 15% increase in average order value through targeted product discovery features.

SKILLS & INTERESTS

Skills: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, ReactJS, Next.js, TypeScript, Python, Flask, MySQL, MongoDB, Kotlin (Android), Data Science & Analysis, RESTful API Design, Payment Integrations (M-PESA, PayPal, Mastercard), Communication APIs (SMS, Email, Push Notifications), Secure-by-Design.

Interests: Passionate about building full-stack products that solve real problems, from intuitive user interfaces to reliable, secure backends. I have a strong interest in fintech and payment systems, particularly within the African market, having worked with M-PESA, PayPal, and Mastercard APIs.
